

DUODENAL-PYLORIC STENT

The weave rotates in both planes
in different directions

GATE Duodenal-Pyloric Stent

1 Uncovered Straight Type

2 Covered Flare Type

Indication for Uncovered Stent

- For malignant pyloric or duodenal obstruction

Features

- Knitted construction with unfixed cells
- The weave rotates in both planes in different directions
- Low migration and shortening
- Excellent conformability and flexibility for placements in tortuous anatomies

Indication for Covered Stent

- For benign and malignant pyloric or duodenal obstruction

Features

- High flexibility and low shortening with knitted construction
- Full silicon cover to prevent tissue ingrowth
- Flare on both ends to minimize migration
- Retrieval string on the distal end for stent removal
